

CONCRETE FLOORING PRODUCTS

AttashiA™

Product Description

AttashiA™ is a unique Ride on trowel attachment that transforms a concrete finishing trowel in to an efficient concrete polishing machine. It's no metal construction ensure that even if it touch to concrete there is no scratching of the finished surface. Multi directional rotating heads ensure even contact with the floor, by multi directional movement of each disc that helps polishing tools to reach every dip in the floor level & achieve even polishing results

HOW IT WORKS...

AttashiA™ Is a no metal disc attachment to be pushed under your ROT.

The correct size disc attachment comes with multi directional rotating 3-5 heads.

The multi directional movement ensures even contact & even wear out of polishing tools.

Maintenance & Cleaning

- Clean the AttashiA™ disc attachment everyday after use.
- Make sure polishing slurry is cleaned thoroughly.
- Grease the rotating head bearings daily before & after use. It will ensure easy movement & 100% contact while in use.
